Business Information

Not open on Sundays. Open on Saturdays by appointment only. Open all day balance of week.

THESE PRICES are in effect Fall 1951 – Spring 1952.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists and dealers. Maryland customers are subject to 2% sales tax or send your License Number. All delivery costs are to be paid by purchaser.

PACKING. All goods are packed in boxes and bales for which we charge sufficient to cover cost of material used. We will add this cost to your invoice. **This cost applies whether you remit with order or buy on time terms.**

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. **We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.**

TERMS. We offer the usual terms: net 30 days from date of shipment to those of known responsibility **but must have satisfactory business references from others or remittance must accompany order.** Those desiring stock shipped C.O.D. will please remit **one-fourth** the amount of their purchase when ordering. Other terms by special arrangement.

NON-WARRANTY. We give no warranty, expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP, whether by express, motor truck or railroad freight. If by motor truck or railroad freight, tell us the route or over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. **It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company.**

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies only to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible, although this is very seldom. Of course, there is a regular season for shipping the different plants, but if you want them out of season and are willing to take the risk of good delivery, we will pack with the utmost care and get them off to you at most any time you want them.

Plan to Visit Our Nursery

We will certainly be glad to have you come to see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. Some of our customers have told us it is better than is furnished by some others. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Delaware, 100 miles from Kiptopeke-Norfolk, Va. ferry, 90 miles from Annapolis, Md., via Matapeake ferry, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N. Y. We hope you can come to see our stock. It is good driving on the famous Eastern Shore.

Ornamental Stock

Air Layering Plants

You have often wanted to propagate some plants of a scarce or high priced variety but did not have the proper facilities to do it with. With a new outfit we are offering, you can do it yourself, as easily as making an old-fashioned graft. You take a branch of the shrub or tree you wish to graft, (leaving it on the parent plant) girdle the branch or twig, put damp peat moss or damp sphagnum moss around the girdled part and wrap it tightly with this new waterproof plastic (in sheets) and tie it, top and bottom, with rubber bands. Generally within six to eight weeks the twig is rooted ready to pot. It requires no watering or other attention until ready to pot. Complete outfit (enough plastic sheets and rubberbands to make 100 grafts) with complete instructions how to do the grafting, for $5.00 postpaid.

THE RARE FRANKLINIA

Here is a plant that just keeps growing in popularity. To see the bloom and fall foliage makes one want it in his own garden.

BOXWOOD

Boxwood is another of our specialties and by growing it in the quantities we do, we are enabled to furnish it at these very low prices. This Boxwood is first-class in every way. We have customers who send us repeat orders several times during a season. We know you will like our Boxwood if you will let us send you some of it. **Good Stock, Good Service and Low Prices.**

CAMELLIA SASANQUA

These handsome flowering evergreens have proven entirely hardy here and we believe they are as hardy as the Kurume Azaleas. They bloom from September until freezing weather. The demand for these plants is increasing about as much as for any plant we grow. Suggest you try them and treat them about as you would the Kurume Azaleas as to soil and culture. For further description ask for our Azalea, Camellia and Rhododendron booklet, no charge.

This nursery was started just 45 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

HOLLY (Ilex)

For many years we have been urging nurserymen to grow more holly. Fifteen years ago there was not very much demand for holly. If you will refer to our catalogs about that time and since you will find we said, "The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell."

Try to buy nice holly now, see how scarce it is. We find demand increasing each season.

ILEX Opaca, Maple Swamp. Good compact grower. Bright red berries.				
3 in. pot plants		$5.00	$45.00	
ILEX Opaca Taber No. 3. A very handsome American Holly with bright, shiny green leaves, evenly toothed. The berries are a very bright red and usually remain on the tree for one year. One of the best of the American Hollies.				
3 in. pot plants		$5.00	$45.00	
ILEX Opaca Xanthocarpa. A yellow berried variety of the American Holly.				
3 in. pot plants		$6.50	$60.00	
ILEX Pedunculosa. Female. Vigorous growing Holly with perfectly smooth, dark green leaves. Its appearance is unlike usual run of Hollies and the berries, which are bright red, hang like small cherries, making this handsome Holly most unusual. Supposed to be very hardy.				
3 in. pot plants		$5.00	$45.00	
ILEX Pedunculosa. Male. A male type of above to use in pollinating the female variety.				
3 in. pot plants	$0.75	$6.00		
ILEX Pernyi (Chinese Holly). Shrub to 10 feet. Leaves crowded with 1 to 3 rigid spines on each side, the upper pair the largest, but shorter at the terminal spiny point, dark green and lustrous above, ¾ to 1 inch long. Fruit bright red. A handsome evergreen and the foliage is most unusual. We like Pernyi very much.				
2 in. pot plants		$4.00	$35.00	$325.00
ILEX Pernyi Veitchi. Similar to above but foliage is larger and plants stronger growers.				
3 in. pot plants		$5.00	$45.00

AUNT MARY'S SWEET CORN

THE SWEET CORN SUPREME

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for $1.00, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

PAINTED WOOD TREE LABELS WIRED

Painted, wired Wood Tree Labels 3½ inches long, which we will furnish as long as they last at $4.10 per 1000.

Why not offer your customers more of the newer plants? You can make more profit than with the older varieties.

1 to 5 at the each rate, 5 or more at the 10 rate, 50 or more at the 100 rate, 500 or more at the thousand rate.

TAXUS (Yew)

It is only in the past few years that nurserymen in the United States have begun to really appreciate and grow the Yew. In England there are Yews more than a hundred years old, but unfortunately the English Yew (Taxus baccata) is not reliably hardy in the north, and many do not realize that the Japanese, and many forms of Media, are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil except that it should not be too wet, but they do appreciate plenty of good plant food. They are immune to many insect pests and plant diseases so destructive to many other evergreen.

The Yew in its many species and forms can well be used in most all places where any other evergreen will do well.

We honestly believe you will do well to plant and grow on some of these Yews.

	Each	10	100	1000
Baccata (English Yew). Widely planted in English Churchyards. A good ornament. Hardy as far north as New York City. Upright, dark green foliage. Very good for the South and where it is hardy.

MORE HATFIELD YEWS

The following varieties were grown from stock purchased from the late T. D. Hatfield. He selected these as being the best of his unnamed varieties and we are still carrying them under his original numbers. We are giving brief descriptions.

	Each	10	100	1000
Media Hatfield No. 2. Real dark foliage, upright grower; very dense; needles medium length. Very good.				
* 4 to 6 in. trans.		$2.25	$17.50	
* 6 to 8 in. trans.		2.75	22.50	
* 8 to 10 in. pot grown		3.25	27.50	
12 to 15 in. B&B.	$2.25	21.50		
18 to 24 in. B&B.	3.25	31.50		
2 to 3 ft. B&B.	4.00	38.50		
Hatfield No. 6. Somewhat like No. 8 in growth but twigs are not as heavy; leaves narrow. Very graceful.				
* 4 to 6 in. trans.		$2.25	$17.50	
* 8 to 10 in. trans.		3.25	27.50	
*10 to 12 in. trans.		3.75	32.50	
*12 to 15 in. trans.		4.25	37.50	
15 to 18 in. B&B.	$2.75	26.50		
18 to 24 in. B&B.	3.25	31.50		
Hatfield No. 7. Bright glossy green, heavy foliage; long needles. Semi-erect full grower.				
* 4 to 6 in. trans.		$2.25	$17.50	
* 6 to 8 in. trans.		2.75	22.50

AS A MATTER OF RECORD

Forty-five years is a long time in a person's life. That is just as long as the writer has owned and operated The Tingle Nursery Company. In this time I have tried to keep abreast of the times in offering you the better and newer plans as they were introduced. During the wars we were slowed down but tried to keep up the quality of our stock. We had to discontinue producing many varieties due to insufficient help. A good bit of the credit for our growth goes to our help; without them we could not have carried on —and without you, our customers, we could not have carried on. I now thank you both and all.

ALUMINUM PLANT TAGS

Azaleas

We have prepared a booklet describing more fully the Azaleas, Camellias and Rhododendrons listed herein. You will note we are only giving a one-line description in this price list. This is done to save space. We will be glad to send you the booklet above referred to if you will tell us you want it. No charge for it.

Azaleas have been one of our specialties for many years. This season we are pleased to offer the largest stock we have ever grown, and at reduced prices, too. If you have not been getting your Azaleas—Lining-Out or Specimen—from us, we wish you would try ours this season. We aim to please you with Azaleas as well as with our other stock.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing—thousands of them being sold for Easter, Mother's Day and Decoration Day. They are comparatively easy to grow and make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out-of-doors as far north as Long Island. They are extremely floriferous, and in season the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

GABLE'S HARDIER AZALEAS

As many of you know, we have been growing and recommending these Gable Hardier Azaleas for several years and the more they are known the bigger the demand for them.

Mr. Gable has constantly had in mind a hardier type of Azalea with a much wider color-range than has heretofore been possible to secure. He has had wonderful success in his efforts. We have been keeping in touch and working closely with him and are much pleased that we can offer the following varieties.

You will notice many new varieties are being offered this season for the first time, some not yet named. As soon as they are named you will be advised of it. We have other varieties of these Gable azaleas which will be offered as soon as we have sufficient stock propagated.

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the new Gable varieties we are offering.

ARNOLDIANA AZALEAS

In 1914, the late Jackson Dawson, then superintendent of the Arnold Arboretum, at Boston, Mass., created a splendid new type of hardy Azalea by crossing Azalea Kaempferi and Azalea Amoena. Of the seedlings thus produced a considerable number of them were grown at Boston from their infancy until flowering age, when the following ones of unusual beauty and vigor of growth were selected.

These Arnoldiana Azaleas have done exceptionally well in Indianapolis, Indiana, and we can recommend them for trial in similar soils and conditions.

CHUGAI HYBRID AZALEAS

A new group from the Chugai Nursery Co. near Osaka, Japan. These are late flowering. Flowers are usually variegated, white or pink ground with red, lilac or purple stripes, white base with colored margin, or purple with white variegation and edge. We do not recommend these for northern sections. They are hardy here. We have many more varieties of these in small lots.

AZALEAS—Kinds and Culture

By H. Harold Hume

This new book, written by an outstanding authority presents a wealth of up-to-date information on Azaleas. All details in the successful growing of Azaleas are carefully explained. Describes typical soils; how to grow them to the most favorable condition; best method of planting and growing on; how to feed, mulch and water them; control pests and insects and various methods of propagating them. Beautiful full color and black and white plates. Worth many times its cost of $4.00 postpaid.

MISCELLANEOUS AZALEAS

In the following list of Azaleas you will find many species; they are not classified or separated as to their different species. We are trying to give such descriptions that you may know, or have a general idea what each variety is like.

2-yr. seedling Azaleas are not as large as our 2-year Azaleas grown from cuttings. S. following size signifies seedling.

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breath-taking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are now being offered. If you want a stimulating (and profitable) hobby that grows more interesting, beautiful and valuable every year, then grow Azaleas.

AZALEAS—Kinds and Culture
By H. Harold Hume

This new book, written by an outstanding authority presents a wealth of up-to-date information on Azaleas. All details in the successful growing of Azaleas are carefully explained. Describes typical soils; how to grow them to the most favorable condition; best method of planting and growing on; how to feed, mulch and water them; control pests and insects and various methods of propagating them. Beautiful full color and black and white plates. Worth many times its cost of $4.00 postpaid.

PAINTED WOOD TREE LABELS WIRED

Painted, wired Wood Tree Labels 3½ inches long, which we will furnish as long as they last at $4.10 per 1000.

CAMELLIAS—Kinds and Culture
By H. Harold Hume

This book does for Camellias what Dr. Hume's **"Azaleas—Kinds and Culture"** does for Azaleas. Tells you things you need to know about the selection, propagation, soil and soil preparation, cultivation, and care of Camellias. Lavishly illustrated with photographs, many of them in full color. Price $6.50 postpaid.

Air Layering Plants

You have often wanted to propagate some plants of a scarce or high priced variety but did not have the proper facilities to do it with. With a new outfit we are offering, you can do it yourself, as easily as making an old-fashioned graft. You take a branch of the shrub or tree you wish to graft, (leaving it on the parent plant) girdle the branch or twig, put damp peat moss or damp sphagnum moss around the girdled part and wrap it tightly with this new waterproof plastic (in sheets) and tie it, top and bottom, with rubber bands. Generally within six to eight weeks the twig is rooted ready to pot. It requires no watering or other attention until ready to pot. Complete outfit (enough plastic sheets and rubberbands to make 100 grafts) with complete instructions how to do the grafting, for $5.00 postpaid.

GLENN DALE HYBRID AZALEAS

The Division of Plant Exploration and Introduction at the Glenn Dale Plant Station began introducing, in 1941, a group of selected seedlings from their own crosses. We have been growing and propagating these plants since then and we are now offering them to the trade.

The purpose of this breeding work was to obtain a class of winter-hardy Azaleas that would have as large and varied flowers as those of the "Indian Azaleas" which are not hardy in this section. Mr. B. Y. Morrison, who has been leading in this work, has done a wonderful job, not only in producing large size and varied colors but has also bred the hardiness into the plants. These plants are most interesting. The flowers run to over 5-inches across and include both self-colored and variegated. The plants are mostly excellent growers and do well here, and from all appearances will grow well in much colder sections.

When I was told they had some blooms that would run over 5-inches across I could hardly believe it but, it is so. I have seen them, and hope to offer some of the plants in another season or two. We only have a small quantity of some varieties, but hope to get all varieties distributed in as large an area as possible so we may have information as to how they grow generally throughout the country. If you get some of these we will appreciate knowing how they grow with you. We suggest you give these a trial.

In addition to the following list, we have many more varieties. A description list of them will be sent on request. The demand for these last season was heavy. We sold all we could spare of many varieties and have sold a good many for delivery this fall.

Our stock of some of these is such that we are greatly reducing prices.

The number following name is introduction number.

Sometimes flowers where striped or flaked on white will be a solid color.

"AZALEAS AND CAMELLIAS" by H. H. HUME

Interest in Azaleas and Rhododendrons is greatly increasing. Until now, little information on varieties, care and culture of these plants has been available. Mr. Hume accurately and thoroughly describes the varieties best suited for various uses and discusses questions on culture, such as soils, fertilization, planting, propagating, and general care, indoors and out. He has taken special care to describe accurately the several groups of Azaleas and Camellias, and his suggestions on the use and culture are very practical. If you are growing Azaleas and Rhododendrons you will find this book much help. While the book is entitled "Azaleas and Camellias" it applies equally to Rhododendron culture. Price $2.50 each, postpaid.

We unhesitatingly recommend "Rootone" as an aid in rooting. We treat every cutting we make with it. This is the greatest recommendation we can give anything.

HORTICULTURAL BOOKS AVAILABLE THROUGH US, POSTPAID

I know of no better investment than that of some good books. You get a lot of what other people know for only a few dollars.

CABOT. A very early variety. Plants seldom exceed 3 feet in height and make a broad low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious subacid flavor.

CONCORD. The bush is of upright habit and at maturity exceeds 6 feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are very fine in flavor.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are among the very largest, light blue, and ripen about the same time as Rubel.

JUNE. A little earlier than Cabot. Berry is large, of medium blue color, sweet and delicious when fully ripe, with a slight subacidity. Newer and probably better than Cabot.

PIONEER. A very fine variety ripening about one week later than Cabot. The bushes are stocky, seldom exceeding 4 feet in height, with a tendency to be broad rather than high. Its stems are stout and stiff, and the winter color of the new growth is a delightful red. Pioneer produces heavy crops of berries close set in the cluster. They are larger than Rubel, of a medium blue color and fine flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses 5 feet in height. The winter twigs are dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

RUBEL. A vigorous, productive variety. Well-developed bushes stand 6 feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

As Good As Can Be Grown

We are exerting effort to produce the very best stock that can be grown, and in our forty-four years' experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of Lining-Out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you give us your order.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies only to this section unless otherwise mentioned.

Root Cuttings

with
THE PLANT HORMONE POWDER

ROOTONE

Just Dust and Plant

No Solutions No Waiting No Watching

We recommend ROOTONE because we have found it of much help to us in rooting cuttings, both in saving of time and in increased roots to the cutting. We use it on all the cuttings we plant. We know it pays us both in better roots and time saved in cutting beds.

ROOTONE is Best for Cuttings Because—

LOW COST. Can treat 30 to 50 cuttings for one cent.

SIMPLICITY. No skill is needed to apply ROOTONE. No measurements, no vials, no elaborate charts to follow, or clock-watching are needed. Just dip in dry powder and plant.

SPEED OF ROOTING. The time of rooting of cuttings is cut by ROOTONE treatment to anywhere from one-half to one-tenth of the time required without treatment.

SURENESS OF ROOTING. Cuttings that root with difficulty, such as holly, magnolia, arborvitae, lilac, and dogwood will respond in greatly increased percentages and in shorter time.

ROOTONE is a general stimulant for plants, supplying extra hormone at times when the plant is able to use more than nature provides.

ROOTONE treatment hastens and improves the rooting of cuttings; hastens germination from seeds and bulbs, resulting in earlier flowering.

2-oz. jar $1.00; 1-lb. can $5.00 postpaid

A two-ounce jar will treat up to 3000 cuttings; pound will treat up to 40,000 cuttings.

No solution or soaking treatment is necessary. Just dip the base of the cutting in dry powder and set in the propagating bed or cold frame.

TRANSPLANTONE

TRANSPLANTONE HELPS SAVE PLANTS

If you have been having trouble in transplanting some of the harder to get to live plants we suggest you try using "Transplantone," The Vitamin Hormone Stimulant For Plants. We understand it has given wonderful results even on Canadian Hemlock collected seedlings. We all know how difficult it is to get a fair percentage of them to live. A three oz. package will treat several thousand plants. All you do is dip the cuttings in water where the Transplantone is mixed. 3 oz. can $1.00, 1 lb. can $4.00, postpaid.

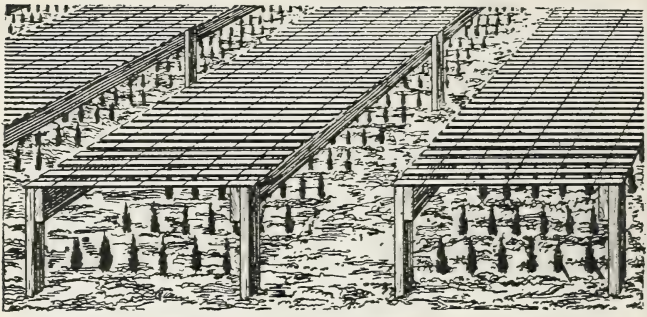
BLUEBERRIES

There has developed an enormous demand for these plants, both for fruit and ornamental purposes. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle. Put in a small stock and let us supply you; will send to you or direct to your customers under your tag.

ALUMINUM SULPHATE

Azaleas, Rhododendrons, Blueberries, Cornus florida, Heather, Kalmia and many other plants require an acid soil. Acid-forming organic matter, such as well-rotted oak leaves helps to increase acidity. Aluminum Sulphate is a good chemical for increasing soil acidity by using ¼ to ½ pound per square yard. Also used for turning hydrangeas blue.

10 lbs. $1.50; 50 lbs. $4.50; 100 lbs. $7.50



This shows one way to use this shading. We stretch wires over beds about 16 inches from ground.

Woven Lath Shading

Our woven lath shading is an efficient and economical material for the protection of newly set rooted cuttings, seed beds and small seedling transplants. It protects them from the hot rays of the sun and strong and destructive winds.

The construction of the beds is simple You can use narrow boards (4 inch) nailed on small stakes (2 x 2 inches or 1 x 4 inches), or you can do as we do. We stretch two wires three feet apart over a four foot bed (this will leave the lath shading extending over each wire six inches. This makes it easy to roll and unroll the shading without rolling off the wires. The wires are placed about 16 inches from the ground, thus giving the small plants plenty of room to grow before reaching the shading.

This Woven Lath Shading is easily handled, and when not in use you just roll it up and store away until ready to use it again.

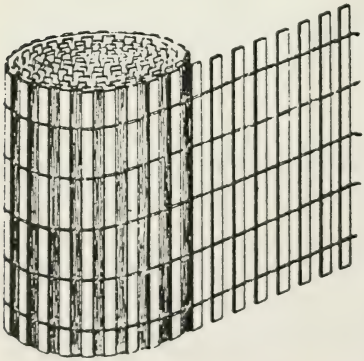
The laths or pickets are approximately ⅜ inch thick x 1½ inch wide and 4 ft. long and are woven with five double strand 12½ gauge galvanized wire, spaced about the width of a lath apart, thus giving the small plants about one-half shade.

This Woven Lath Shading is painted with a solution of red mineral oxide, greatly extending the life and use of the shading.

It is made in rolls of 50 and 100 feet. Can be easily handled by one or two persons.

It is also useful for making fences, to protect new plantings of grass and shrubbery around parks and fields and many other uses you may find for it. Can be easily rolled up again at any time and stored in a small space for future use.

A little investment in proper protection of tender and newly planted plants may save you many tedious hours of labor, considerable expense and may even save you an entire season's growth of your valuable plants.



Why take chances of sun ruining your plants? You can get over 3,000 plants under 100 feet roll when planted 4 in. apart each way.

Another big advantage of using this Woven Lath Shading is that you can water your plants even while the sun is shining hot on them. This means a lot in continued dry weather. Price: Up to 500 ft. at 23 cents per running foot, over 500 feet at 22 cents per running foot. Large quantities specially priced.

The Rare Franklinia

(Franklinia Alatamaha; Gordonia Alatamaha)

One of Our Best Sellers

Franklinia have proved hardy in Toledo, Ohio for past four years.

Our sales of Franklinia have increased more in the past three years than that of any plant we sell. It is one plant most every one wants once they see it and they tell their friends about it too.

This exquisite fall-flowering tree was brought in 1777 from the banks of the Alatamaha River in Georgia to Bartram's garden at Philadelphia. John Bartram, recognizing its extraordinary beauty and value, named it in honor of his life-long friend, Benjamin Franklin.

The original grove of Franklinia trees was again visited in 1790, but from that day to this no one has seen these trees growing in the wild, though many expeditions have searched the banks of the Alatamaha for them.

Franklin's tree is beautiful in detail and marvelous in landscape effect, besides blooming at a season when few shrubs or trees are in flower.

The slender trunk and graceful branches are so muscular and sinewy in appearance that one almost expects motion as under a greyhound's skin. The bark is smooth and dark gray, with wavering lengthwise markings of lighter color.

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From this shelter emerge four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. **There is a constant succession of bloom till hard frost.** We frequently get the unusual effect of a tree clad in crimson, autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than 3 or 4 feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens 30 feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun, has proved entirely hardy about New York and hardy in favorable locations about Boston. It is an especially desirable tree for the small, intimate garden, loved and lived in. It is a charming lawn tree and the grass may be allowed to grow closely about the trunk. It also thrives when planted by pools, lakes and streams. Its light elegance of form and color contrasts exquisitely with the dark green of conifers.

This nursery was started just 45 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.
